

**ENGINEERING & SERVICE TIPS**

Concerning : Carrier new features  
Date issued : August, 2021  
Issued : Mr. L. Voogd lvd@beijerref.com

---

In the last few weeks, I have been informed that there are some new accessories available in order to make our units more competitive.

1. Wi-Fi, connected to Alexa or Google home
2. Additional air fresh filters for Hiwall QHG
3. Plenums for Duct QSS

**1. Wi-Fi, connected to Alexa or Google home**

From now on, it is possible to connect our AC equipment to home management systems, like Alexa and Google Home. Next to the updated user manual for Wi-Fi, you can also find a PowerPoint presentation for further information at the Carrier website.

**2. Additional air fresh filters for Hiwall QHG**

In order to create better air quality, FMCC introduced additional filters for Hiwall QHG indoor units.

Coolmark number; 7409802      Netto price; € 1,98 per piece

12100206000045 维他命 C+冷触媒+防螨

Compound fresh filter: vitamin C +Cold catalyst+Anti mite

Coolmark number; 7409767      Netto price; € 1,37 per piece

12100204A00135 冷触媒+活性炭+银离子

Compound fresh filter: Cold catalyst+ Active Carbon+ Silver Ion

These filters need to be installed at the backside of the normal air filter. At the Carrier website, you can find additional information regarding air filtration, under the button "Training material".

### 3. Plenums for Duct QSS

Coolmark has designed inlet and outlet air plenums to combine with our DUCT (QSS) indoor units. If you want to buy those plenums from Coolmark, please contact them for prices and lead-times.

If you only need the drawings for local manufacturing, please contact me and I will send you the drawings for all models.

Ofcourse the outlet plenums will be insulated to avoid condensation.

Drawing below shows an example for an outlet air plenum for model 24K, which has 3 connections for flexible air hose of 200 mm.
